

LASERTEC OPENING NEW FACILITY

In addition to our main Sterling Heights, Michigan location, Lasertec, Inc. is proud to announce the opening of a second production facility July 1, 2009.

Not only will this additional plant support our growing business needs but provide a key element to our extensive disaster recovery plan and serve as a full back-up facility in the event of a work disruption. Lasertec provides a full back-up system for processing, printing, and delivery.

Both facilities will have security cameras and keyed access doors to any critical data area to ensure our continued high level security commitment to our customers' confidential information.
